**Product Description:** Utilizing Obsidian Nanofilter Technology™, Obsidian INFINITE+ seamlessly provides unprecedented ambient light rejection and enables vivid colours and deep blacks that would normally only be possible in a fully darkened home theater. Now you can enjoy your home theater in a range of lighting conditions throughout your home!

With Obsidian INFINITE+, you enhance the viewing experience for your entire audience with the addition of advanced optical light-bending materials providing a more uniform and brighter viewing experience from all viewing angles while still maintaining the high-contrast and benefits of our Obsidian Nanofilter Technology™.

**Recommended applications:** Residential spaces, Living Rooms, Open-Concept Spaces & Home Theaters where high-contrast performance is essential and you no longer wish to be limited by the ambient lighting conditions of your room.

**Recommended Projectors:** Screens utilizing Obsidian Nanofilter Technology™ are designed for optimal performance with *select* 3LCD projectors. All Obsidian INFINITE+ Systems are supplied with a matching projector for best results & experience. Option to upgrade to premium projector models is available.

For installations with pre-existing DLP projectors, screens utilizing Obsidian Nanofilter Technology™ will still produce excellent results.

**Technical Information:** Screen Gain 0.5

**Mounting method:** Obsidian INFINITE+ is produced and delivered 'Hang-Ready' using a French Cleat mounting system which goes up in minutes; All mounting hardware included.

**Framing:** All Obsidian INFINITE+ screens are supplied with a durable black elastomeric frame, with the option to upgrade to our proprietary Brushed Aluminum 'Tap-on' Framing System.
