Product Description: Utilizing Obsidian Nanofilter Technology™, Obsidian INFINITE seamlessly provides unprecedented ambient light rejection and enables vivid colours and deep blacks that would normally only be possible in a fully darkened home theater. Now you can enjoy your home theater in any room or lighting conditions throughout your home!

With the option for a curved display, you can achieve the absolute best contrast performance in home theater environments with an immersive environment thanks to the perfectly curved contour.

Recommended applications: Residential spaces, Living Rooms, Open-Concept Spaces & Home Theaters where high-contrast performance is essential and you no longer wish to be limited by the ambient lighting conditions of your room.

Recommended Projectors: Screens utilizing Obsidian Nanofilter Technology™ are designed for optimal performance with *select* 3LCD projectors. All Obsidian INFINITE Systems are supplied with a matching projector for best results & experience. Option to upgrade to premium projector models is available.

For installations with pre-existing DLP projectors, screens utilizing Obsidian Nanofilter Technology™ will still produce excellent results.

Technical Information: Screen Gain 0.55

Mounting method: Obsidian INFINITE is produced and delivered 'Hang-Ready' using a French Cleat mounting system which goes up in minutes; All mounting hardware included.

Framing: All Obsidian INFINITE screens are supplied with a durable black elastomeric frame, with the option to upgrade to our proprietary Brushed Aluminum 'Tap-on' Framing System.
