Product Description: Platinum Series screens provide remarkable ambient light rejection and enable more vivid colours and deeper blacks compared to other home theater screens on the market. Platinum is designed to be flexible and without constraints, enabling 'Obsidian Quality' performance, but no longer with the limitation of what projectors can, or cannot be used. With Platinum you have much greater freedom of choice in designing your premium home theater!

With the option for a curved display, you can achieve the absolute best contrast performance in home theater environments with an immersive environment thanks to the perfectly curved contour.

Recommended applications: Residential spaces, Living Rooms, Open-Concept Spaces & Home Theaters where high-contrast performance is essential and you no longer wish to be limited by the ambient lighting conditions of your room.

Recommended Projectors: All Platinum Series screens are designed to be our most versatile screen material and as such are compatible with ANY projection technology available on the market; Platinum is the ideal choice if you wish to source your own projector or reuse an existing one in your home theater.

Technical Information: Screen Gain 0.75

Mounting method: Platinum Series screens are produced and delivered 'Hang-Ready' using a French Cleat mounting system which goes up in minutes; All mounting hardware is included.

Framing: All Platinum Series screens are supplied with a durable black elastomeric frame, with the option to upgrade to our proprietary Brushed Aluminum 'Tap-on' Framing System.
