

Obsidian TILES

Product type: Front Projection Tile on PVC foam core, Ultra-Wide Viewing Angle

Dimensions: w: 24" x h: 54" [61x137cm]; 6mm thickness

Weight: 6.6lb [3.0kg] per panel

Product Description: Utilizing Obsidian Nanofilter TechnologyTM, our most advanced projection screen material available, Obsidian TILES offers both scalability and unparalleled front projection performance and visibility. Suitable for a wide range of challenging ambient light conditions, Obsidian TILES provide 'beyond 180 degree' viewing angles while maintaining outstanding colour fidelity and ambient light rejection to achieve spectacular colours and image quality.

TILES can be effortlessly joined together to form any size of digital canvas, or kept apart to form multiple unique and customizable displays. The only limits to your display are the limits to your imagination!

Recommended applications: Premium Commercial/Retail displays where high-contrast performance is essential and the control of ambient lighting is challenging or not an option.

Recommended Projectors: Screens utilizing Obsidian Nanofilter TechnologyTM are designed for optimal performance with *select* 3LCD projectors. For new installations, please contact us for details and recommendations on projector selection. For installations with pre-existing DLP projectors, screens utilizing Obsidian Nanofilter TechnologyTM will still produce excellent results.

Technical Information: Screen Gain 1.2

Mounting method: TILES can be produced *optionally* 'Hang-Ready' which provides a French Cleat mounting system for hanging. For custom solutions, the PVC foam core material is versatile and suitable for alternative methods of installation.
