

Pearl Ultra-Short Throw

Product type: Enhanced Contrast ALR Ultra-Short Throw (UST) Front Projection Screen

Available Sizes: 90" – 120" diagonal in 16:9 aspect ratio.

Mounting: Wrinkle-free foam-backed panel.

Product Description: Utilizing our proprietary LightControl Technology™, Pearl UST is engineered for maximum performance & uniformity when paired with any ultra-short throw projector. It delivers wrinkle-free and hassle-free installation along with bright, vivid colours and market leading light rejection.

Pearl UST excels at getting the most out of ultra-short-throw projectors while making installation quick, painless and long-lasting. Pearl UST is a top-quality lenticular screen that absorbs ceiling light and that offers a 170 degree horizontal viewing angle. It is therefore ideal for group viewing.

Recommended applications: Residential spaces, Open-Concept Spaces & Home Theaters where enhanced contrast performance combined with high brightness is required.

Required Projectors: Pearl UST is designed to function exclusively with ultra-short throw projectors.

Mounting methods: No assembly is required. Pearl UST is delivered as a foam-backed panel in sizes of 90", 100", 110" and 120" diagonal. A stylish and durable narrow-bezel black anodized frame is included. This panel format comes ready-to-hang on French cleats (also included). It completely and permanently eliminates wrinkles, yet is able to flex during transport to pass through stairways and tight corners.

Options: Custom sizes are available.
